A Personal Message to You

Dear Customers and Friends:

For three generations (91 years) we have grown first quality government inspected nursery stock. Here in the fertile Miami River Valley of central Ohio we have ideal soil and growing conditions for producing a superior grade of sturdy well-rooted plants. The packing sheds pictured below contain about 75,000 square feet of floor space, nearly two acres. If your order is for one plant or carload, the stock is handled under roof, out of sun, wind, and cold so as to reach you in good growing condition. Today we can offer you better plants, better service, and better values for your money. We solicit your patronage whether your wants are large or small.

To show our appreciation to YOU and to thousands of other satisfied customers who have patronized us through these successful years, we have prepared this catalog offering attractive novelties and dependable varieties at prices you cannot afford to overlook. To deserve the confidence you have shown in us we renew our pledge to constantly strive to improve our merchandise, our packing, prompt shipment, and give you the best values for your money.

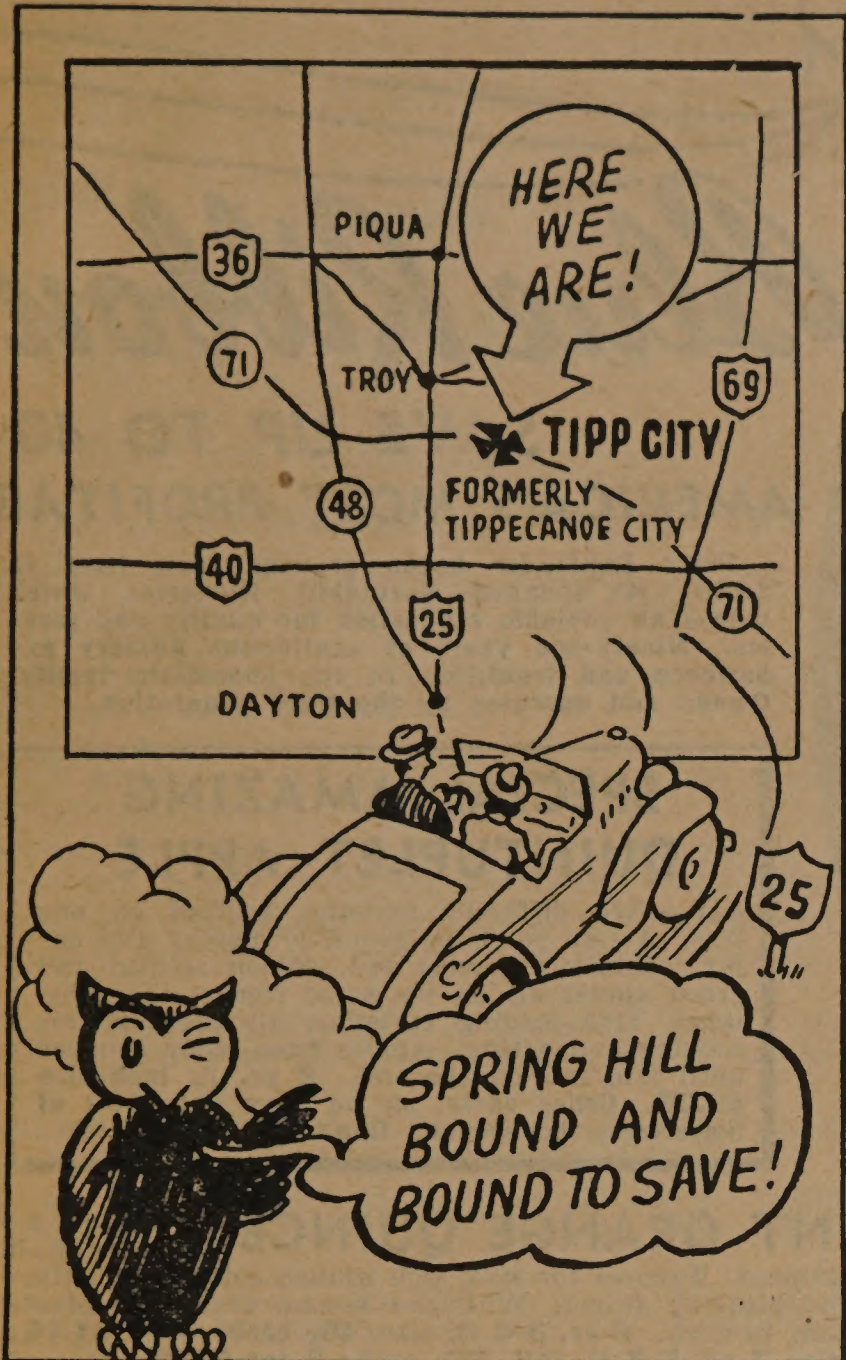

Sincerely yours,
THOMAS B. KYLE, Pres.

IMPORTANT NOTICE

Due to our extremely low prices we do not prepay the postage or other transportation charges. On orders of three dollars or less please add 10% additional for packing and postage. All orders amounting to three dollars or over will be sent by express, shipping charges collect. (If you live on a rural route we will, if requested, send your order by parcel post and bill you for the postage.)

SPRINGHILL NURSERIES.

**OUR POLICY—EVERY CUSTOMER
MUST BE SATISFIED**

Springhill's Double Guarantee of Satisfaction

SAFEGUARD TO YOU—AN ASSET TO US

FIRST: We guarantee all our stock to be true to name, good, healthy, and first class. Even with the high quality of Springhill's stock, success depends largely upon soil, proper planting, weather conditions, etc., which are beyond our control. Nevertheless, we will replace stock at half the purchase price if the complaint is made by October first of the same year the stock is shipped. It is mutually agreed that at no time will we be held responsible for a greater amount than the original purchase price.

SECOND: We guarantee our merchandise to be in good growing condition when received. Complaints should be made immediately on receipt of stock. Our success depends upon your patronage and it is our sincere desire to please. We urge you to write us if you are dissatisfied in any way, as we **GUARANTEE SATISFACTION.**

TERMS

Your remittance should accompany the order. It may be made in the manner most convenient to you; i. e., money order, check, or currency.

UNLESS REMITTANCE ACCOMPANIES ORDER, ALL STOCK WILL BE SHIPPED C. O. D. Remember this way of shipment costs more. NO ORDERS FOR LESS THAN \$1.00 ACCEPTED.

All packages too large for parcel post shipment are sent express collect.

BUY AMERICAN—New Super Hardy American Plums

The cream of the crop from a race of new plums hybridized by America's leading government hybridizers. The dwarf trees withstand sub-zero weather of the Northwest. The fruits are more mildew resistant. These varieties are best for their season, quality and delicious flavor.

JUNE BERRY Amelanchier—913 — This beautiful American shrub yields an abundance of rich dark red fruits that are excellent for cooking and eating. The fruits resemble blueberries and the plants cost much less. They will grow in any soil; perfectly hardy, and will transplant and grow very easily. The plants grow about 8 to 10 ft. tall and are filled with beautiful snow white flowers in early spring. The tasty red fruits mature in June. 1 to 1½ ft. plants, 2 for 45c; 6 for \$1.15; 12 for \$1.95; 100 for \$15.00.

June Berry

SUPERIOR 914 — Beautiful, large heart shaped, bright red, high quality fruit. Bears the second year and is one of the first to ripen. Strong 2 yr. 3 to 4 ft. tall, 45c each; 5 for \$1.95. Super size 2 yr. 5 to 7 ft. tall, 65c each; 5 for \$2.95.

OMAHA 915—Very large, round, dark rich red fruits that are sweet and delicious. The pits are small and quality unsurpassed. Tree hardy as an Oak and succeeds both North and South. Bears the second year. Strong 2 yr. 3 to 4 ft. tall, 45c each; 5 for \$1.95. Super size 2 yr. 5 to 7 ft tall, 65c each; 5 for \$2.95.

GIANT BLUEBERRIES

New cultivated varieties famous for size, flavor, profit, and beauty. Large clusters of pink buds which open into white bell-shaped flowers followed by the sapphire blueberries in June often large as grapes. Four plants in your yard will furnish you with blueberries for pies throughout the season. We offer Rubel and Jersey, the two leading varieties. Plant 2 or more plants for cross-pollination necessary for good yields. 6 to 12 inch, 2 yr., 2 for \$1.95; 4 for \$3.65; 10 for \$7.95. 15 to 18 inch, 3 yr., 2 for \$2.59; 4 for \$4.50; 10 for \$9.95. Blueberries are profitable. Many growers are getting rich. 1 yr. rooted stock for commercial plantings, 25 for \$12.50; 100 for \$35.00.

GOLDEN MUSCAT

New Hardy California Grape—Government plant scientists have crossed the largest California grapes with our native varieties. Golden Muscat is the best of the new hybrids. This perfectly hardy variety has large bunches of delicious golden fruits which have only a few seeds. A new and different grape for the Middle West which we recommend highly. 2 yr. No. 1, 90c each; 3 for \$2.45; 10 for \$7.50.

NORTHWEST HARDY APRICOTS Recently introduced by Prof. N. E. Hansen of South Dakota State College. They are one of the most drought-resistant of all trees, full foliage and with a great crop of fruit. They are hardy almost anywhere in America.

MANCHU 911—Largest yellow. Heavy producer. Makes sauce of excellent quality. 2 yr. 4 to 6 ft. trees, 90c each; 3 for \$2.25.

SANSIN 912—Large fruit in heavy crop. Excellent quality fresh fruit makes a rich orange yellow sauce. 2 yr. 4 to 6 ft. trees, 90c each; 3 for \$2.25.

NANKING CHERRY 916—(Prunus Tomentosum) — This fine new cherry from the Orient planted for its ornamental beauty, as well as for its fine fruits. A true, hardy, flowering cherry with excellent fruit. The cherries resemble Montmorency, but are smaller with spicy tartness not found in our native cherries. The sweet, olive-size fruits are borne in profusion and are truly delightful for making fine jams and wines. Strong 1½ to 2 ft. plants, 35c each; 4 for \$1.25. 1 to 1½ ft. plants, 2 yr., 25c each; 3 for 60c.

PLANTING RASPBERRIES, BLACKBERRIES, DEWBERRIES, YOUNGBERRIES, BOYSENBERRIES

The above varieties resemble one another in general cultural needs.

WHAT TO PLANT—Strong plants of any variety in this catalog are good.

WHERE—Plant in almost any soil. However, berries grow best in rich soil. **WHEN**—Plant in early spring or fall.

HOW—Work ground evenly and thoroughly. Make hole large enough to accommodate roots without cramping. Cover crown of plant 1 to 2 inches, being sure the roots

are not turned up or crowded. Firm dirt around roots but keep surface of ground loose. In mid-summer after canes have grown, pinch top about two feet above ground to make branch. The second year after harvesting the crop, cut out all old canes. Repeat year after year. Cultivation and fertility are essential for good, thrifty, disease-free plants.

PLANTING DISTANCE—Raspberries and Blackberries 3 ft. by 6 ft.; Youngberries, Boysenberries and Dewberries 6 ft. by 6 ft.

LUCRETIA DEWBERRIES 1012—The first berry to ripen—ten days to two weeks ahead of blackberries. The large Lucretia Dewberries bring a big market price and are a source of real enjoyment in a home garden. Practically disease free and of easy culture. Unexcelled for eating and canning. New Low Prices—1st class No. 1 size, 12 for 55c; 25 for 90c; 100 for \$2.65. 2 yr. bearing age, 12 for 95c.

CHIEF 1014—New variety. Ripens earlier than Latham, greater hardiness, more disease-resistant, bears more abundantly. Fruit very red.

NEWBURGH 1015—A new introduction by New York Experiment Station. Newburgh has proven very successful in all sections. Very hardy, healthy, and tall growing. Fruit very large, firm, bright red with superb flavor.

CUMBERLAND 1016—The largest of all black caps; firm and a good shipper. One of the most profitable as a market berry.

LATHAM 1013—Best of all the red varieties for most sections. Splendid strong growing, producing immense quantities of bright red extra large berries.

NEW LOGAN 1017—By far the best early black cap. Large glossy high quality fruit.

BLACK BEAUTY 1018—An excellent new luscious variety. Succeeds extra well and very disease-resistant. Popular with commercial growers.

New EVERBEARING INDIAN SUMMER

1019—A large red everbearing raspberry superior to all others. Certain to be profitable commercially because of the demand and high price of berries in the fall. Think of picking fresh raspberries from your garden to eat from September until killing frosts. They bear in the spring like other raspberries and again in the fall. The fruits are large and of high quality. New Low Prices.

HAVE SOME STRAWBERRIES!

Most of us recall the delightful hours spent in a strawberry patch. The strawberry is our most cosmopolitan fruit, adapting itself to practically all climates and soils.

DORSETT 1110—A new berry originated by the United States Department of Agriculture. Superior to Premier. A decided "money-maker" with large, scarlet-red berries of the finest quality, size, and flavor.

SENATOR DUNLAP 1111—Has unusually long fruiting season. Bears immense quantities of large, rich, fine flavored dark red berries. A dependable and favorite variety.

NEW BLAKEMORE 1112—(U. S. D. A. yellow free.) A comparatively new Government introduction of real merit. Succeeds under a wide range of soils. Extra productive. Supreme for marketing and preserves.

PREMIER 1113—Is the earliest worthwhile strawberry. A heavy yielder and always in great demand. An old dependable favorite.

CATSKILL 1114—New heaviest yielding late strawberry recently introduced by New York Experiment Station. A fine vigorous grower with large late ripening berries about the size and quality of Dorsett. Extend the strawberry season—plant Catskill.

AMBROSIA 1115—Ripens a month later than Premier. The newest and latest ripening high quality healthy strawberry. Ambrosia is self-pollenizing, extremely hardy, and tall, maturing its fruits off the ground. It commands premium prices because of the extra large sparkling bright red sweet fruits that mature when June varieties are gone.

Delphinium Steals the Show

SPRINGHILL'S SUPERB HYBRID DELPHINIUMS

3710—Mr. W. F. Bohlender, former owner and manager of Springhill Nurseries, now deceased, visited Europe and selected the Superb Hybrid Delphiniums in the opposite picture. Here we have the newest and finest of any Delphiniums to be offered anywhere. The colors range from the palest shade of blue to royal purple and contain many pastel tones of mauve and pink blendings. This strain contains both single and double flowered forms. It is not unusual for them to bloom 3 or more times in a single season. Plant these in bold groups in your hardy border. 30c each; 3 for 75c; 6 for \$1.25; 10 for \$1.95. Seed, 30c per pkt.

BELLADONNA

DELPHINIUM 3711—

While these plants do not throw quite as tall a bloom as the English strain, they produce spikes which are more graceful and therefore better adapted for cutting. They grow 3 to 4 feet in height and their first bloom appears during the month of June. Color, light sky-blue. 20c each; 3 for 50c; 12 for \$1.75. Seed, 20c pkt.

New DELPHINIUM

LA MARTINE 3713—

A new and different color. Spikes of rich deep indigo blue flowers with white eye. A sturdy, healthy and vigorous growing variety. People who have difficulty growing Delphinium should succeed with La Martine. The giant size spikes grow 2 ft. long on 5 ft. stems in great profusion throughout the summer. 25c each; 5 for \$1.00.

Directions For Planting Evergreens

Evergreens have resins in their sap so if they are permitted to dry or wither, there is little hope that they will live. Plant immediately. Dig large hole and fill two-thirds with rich top soil covering roots of plant. Then water until water fills hole. When the water has leached away, fill remainder of hole and firm soil. Keep tops and soil well watered the first summer.

Dwarf Golden Biota

HEMLOCK (*Tsuga*) — 5112 — Canadian Hemlock. Most beautiful and graceful tree with dark lustrous and lacy foliage. Excellent for shady locations, also does well in the sun. HOW TO PLANT EVERGREENS

Plant evergreens immediately upon arrival as they have resin in their sap and if the plants shrivel or dry, the sap sets, causing permanent injury. Keep from sun and air. Dig hole 8 to 10 inches larger than the ball of earth or root spread. Set evergreen 1 inch to 2 inches deeper than soil marks on the trunk of the evergreen. Fill hole half full of rich top soil, firm well, then fill hole with water. As water leaches away, fill remainder of hole. For a few weeks, water tops each evening when the sun is down. Also keep roots well watered. When evergreens are watered in well, you do not need to remove burlap. The burlap will rot and supply organic plant food for the plant.

QUALITY GRASS SEED

*A Beautiful Lawn
adds to the charm of
your home*

after sowing be sure to sprinkle. Mow as soon as tall enough, as mowing makes the plants stool out. If soil is not the best, fertilize with turf builder and reseed any bare spots. Springhill's seed formulas are dependable and reliable. They are the results of many years research and are blended from the World's most choice grasses.

Sow seed from early spring to late May when the ground is moist. A well prepared seed bed is essential, so work your soil thoroughly six to eight inches deep. Add humus to heavy soils. Good seed is important and economical. Sow 1 pound of seed to 200 square feet of lawn; if soil is dry

IT PAYS TO BUY THE BEST FOR ECONOMY AND RESULTS.

KENTUCKY BLUE GRASS

5410—Most dependable and cosmopolitan grass; growing well in most all locations and soils. Our blue grass seed is top quality, almost 100% free of weed seeds and high germinating fresh crop seed. It pays to buy high grade seed for results. 1 lb., 35c; 5 lbs., \$1.50; 100 lbs., \$27.50.

SHADY LAWN

5411—For places where the lawn gets less than six hours of sunlight. A splendid blend of shade-loving grasses which thrive with little sunlight and moisture. 1 lb., 45c; 3 lbs., \$1.15; 10 lbs., \$3.75.

EVERGREEN MIXTURES

5412—Composed of choice perennial grasses blended so they will grow quickly and make a sturdy sod in six weeks. We can recommend this mixture for those who want a sun and wear-resisting turf. Used extensively by parks and cemeteries, so it must be good. 1 lb., 38c; 5 lbs., \$1.75; 25 lbs., \$7.95.

HOW TO PLANT

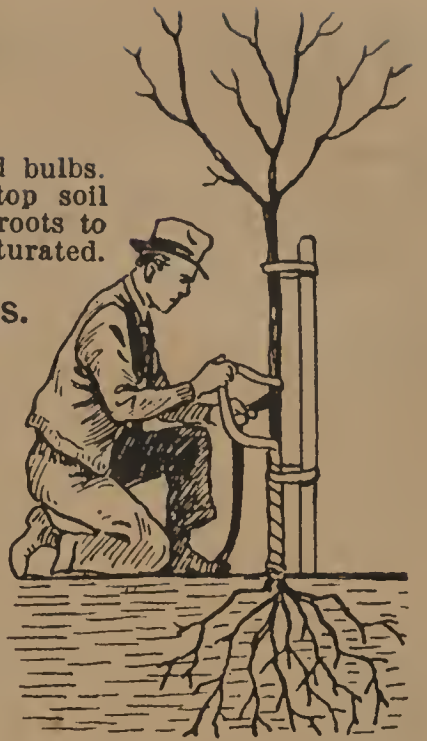

The diagrams show the proper depths and method of planting shrubs, flowers, roses, and bulbs. Rules for successful planting: 1. Dig hole larger than root system. Fill loose, fertile top soil around the roots. The loose fertile top soil is more nutritious and enables the new, tender roots to grow. 2. Fill hole about two-thirds full, firm or pack soil, then water until completely saturated. Fill remainder of hole with dry soil.

WE ARE GLAD TO ASSIST YOU IN YOUR GARDENING AND PLANTING PROBLEMS.

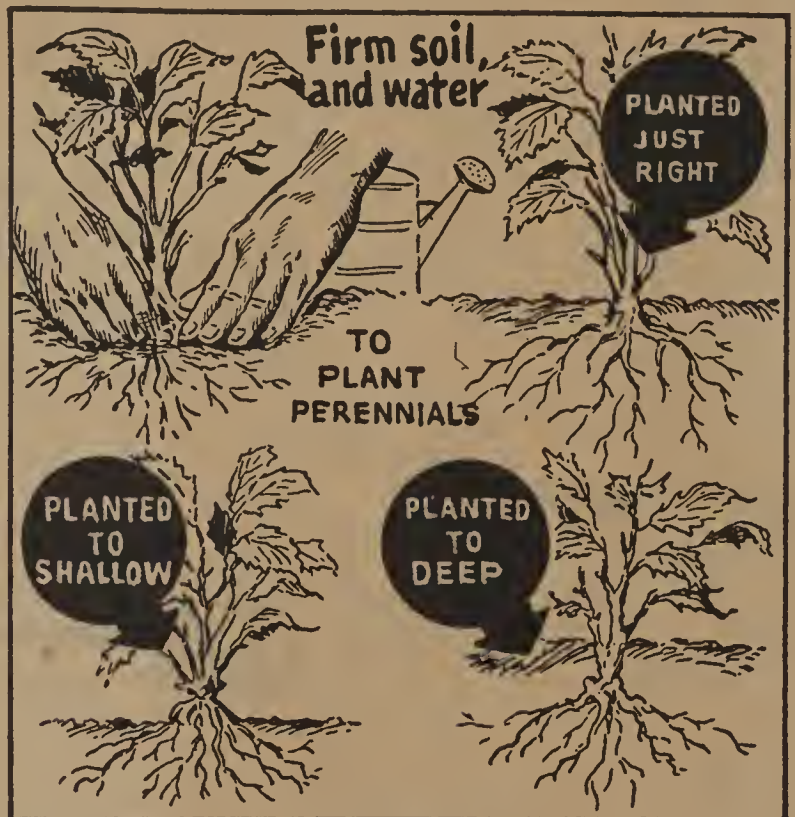

DIRECTIONS FOR PLANTING TREES

If possible, plant trees immediately on arrival. In any case keep roots moist. Do not expose to sun and air. 1. Dig hole large enough so that roots will not be crowded, plant 2 inches deeper than soil marks at base of tree. 2. Fill hole half full of rich top soil, firm well and fill hole with water. When water has drained away, fill remainder of hole with balance of dirt. 3. Prune top well back as this helps tree to grow. About once a week water until soil is completely saturated. Wrap trunk with burlap or paper to prevent sun scalding and borers. If tree is large and shaken by wind, stake tree. See illustration below.

HOW TO PLANT STRAWBERRIES

See picture and description on page 11. How to plant raspberries, boysenberries, blackberries, dewberries, and youngberries see page 10. How to plant grapes see picture and description on page 13. How to plant flower seed see page 60. How to plant roses see picture and description on page 60. How to plant grass seed see page 54. How to plant evergreens see page 52.

DIRECTIONS FOR PLANTING FRUIT TREES

Trees should be planted immediately after arrival, if possible. After opening package, keep roots covered with damp cloth—never expose to sun and air.

1. Notice cut opposite.
2. Dig hole large enough so that roots will not be crowded. Make separate pile of fertile top soil—the first six or eight inches first removed from hole.
3. Tree must be planted two inches deeper than grown in the nursery, or two inches deeper than old soil mark around tree.
4. Put fertile top soil around roots breaking up so that there are no air pockets. Fill hole about two-thirds full, pressing earth down firmly. Water well. Fill hole to top.

The first year a mulch of well-rotted manure should be used to hold moisture and build fertility. No other fertilizer should be used until the second year. Do not let fertilizer or manure come in contact with roots or body of tree.

DIRECTIONS FOR PLANTING AND GROW-
ING ROSES

Follow simple directions in picture and you will succeed with our hardy roses and enjoy an abundance of bloom. A well drained soil is essential. With heavy soils adequate drainage should be provided. Plant below the bud or where the branches start. This is usually about 2 inches deeper than they grow in the nursery row. After planting, mound up about 6 inches high around top of plant. Cut off top of rose bushes 1 or 2 inches above top of mound. Do not remove mound for at least ten days. Plant roses in beds 18 to 24 inches apart. Water well when planting. Fertilize with manure or any good commercial fertilizer about two weeks after roses have been planted.

PLANTING FLOWER SEEDS

Plant or cover seed 3 times diameter of seed. If seed is 1/8 inch in diameter, plant 3/8 inch deep. Fine seed, sow or broadcast on top of ground, rake soil lightly after sowing. Keep continuously moist until seed germinates. Best to cover seeds with a light mulch of straw, leaves, or burlap to keep hot sun from drying out the seed. Remove mulch or burlap soon as seed germinates. Dig and rake soil thoroughly before seeding.
